

Facts about Butterflies

It's said they got their name because they would fly around milk and butter.

They can't hear.

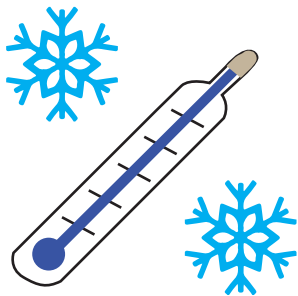

Butterflies live on all continents except Antarctica.

They "taste" with their front feet.

They can't fly when it's cold.

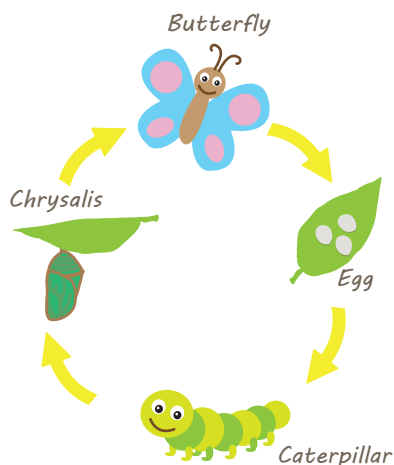

Female butterflies are usually larger and live longer.

A group of butterflies is called a kaleidoscope or also a swarm, flutter or a rabble.

The life cycle of a butterfly has 4 stages - egg, caterpillar, chrysalis and adult butterfly.

They have 4 wings.

They feed mostly on nectar and pollen from flowers.
