

Facts about Venus

It orbits the Sun in **224.7 days**
(as opposed to **Earth's 365**).

Venus is the hottest planet
in our solar system.

It has pretty much constant temperature
during day and night 462°C / 863°F .

A "Morning Star" and "Evening Star"
is the same thing -
it's in fact planet Venus
(the brightest "star" on the sky besides the Sun).

Venus has an atmosphere.

Venus has clouds and
they can produce lightning.

It has no moons.

It's Earth's "sister planet"
as it's similar
in size, mass,
composition and gravity.
